KEY METRICS

45 countries served
40+ rail operators integrated
100+ B2B clients
29 team · 15 engineers led
\$1-5M revenue business

LEADERSHIP

Engineering leadership (15+)
Product strategy & roadmap
Technology & cloud strategy
P&L & budget ownership
Board & stakeholder comms

AI & AUTOMATION

LLM orchestration & agents
Multi-agent workflows
Legal-tech & doc intelligence
Financial AI systems

ENGINEERING

Python · PHP · JavaScript
MySQL · PostgreSQL
AWS · Azure · GCP
REST APIs · iOS/Android
GitHub · Sentry

COMMERCIAL

Enterprise partnerships
Technical / solutions sales
Solution architecture

EDUCATION

B.A. Business Management

EXECUTIVE SUMMARY

Founder-operator and technology executive with 25+ years building and scaling companies across multiple industries — travel-tech, retail, fintech, online media, and enterprise software. Combines genuine engineering depth — Python, multi-cloud, APIs at scale — with full product ownership, commercial negotiation, and team leadership of up to 29 including a 15-engineer organization. Most recently scaled a global B2B travel-technology platform over a decade, and now designs and ships AI agent systems in active customer use across legal and financial workflows — bringing a builder's command of LLM orchestration to a technology-leadership role.

PROFESSIONAL EXPERIENCE

Founder, CEO & Product Leader

2016 – 2026

Save A Train — global rail-distribution platform

- › Founded and scaled a B2B rail-booking and distribution platform serving 100+ business clients across 45 countries; grew it to a \$1-5M business.
- › Built and led the full organization of up to 29 people, including a 15-engineer team across web, mobile, API, and data.
- › Owned the entire product lifecycle — roadmap, architecture, release, and commercial alignment — and ran multi-cloud infrastructure across AWS, Azure, and GCP.
- › Integrated 40+ international rail operators; delivered iOS and Android apps and a partner-facing API.
- › Led enterprise partnership and commercial discussions with major travel and technology organizations; presented strategy and performance to the board.
- › Wound down operations in 2026 *as enterprise rail-distribution adoption lagged forecasts and travel-tech capital rotated to AI — accelerating a full pivot into building AI systems.*

CTO & Builder — AI Systems

2024 – Present

Independent — Tel Aviv

- › Designs and ships AI agent and automation systems hands-on — LLM orchestration, Python, multi-cloud — currently in active customer use.
- › Legal-AI assistant serving practicing Israeli lawyers: bilingual (Hebrew/English) document search, legal-source retrieval, and case-workflow synthesis.
- › Multi-agent decision-support that simulates executive perspectives for strategic analysis; financial-signal agents integrating multiple models and live data sources.

Founder & Investor — Digital Media & Ventures

2010 – 2016

Robinhood · Accessteam · angel investing

- › Built and operated online media and content businesses; angel investor and advisor to early-stage startups (INTKEYS, Clicksi). Completed B.A. at Ono Academic College (2013).

& Information Systems

Ono Academic College · 2013

Executive & entrepreneurship programs

BEYOND WORK

Creator & audience builder

@thedadlifeway · 12,000+ followers
family & lifestyle, grown organically
over 2 years

Owner, Founder & CTO

2003 – 2007

Kilombo Multimedia Ltd. — Herzliya

- › Built and ran a multimedia import/distribution business (3 stores + online), ~5M NIS annual revenue; led 15 staff and online sales across major marketplaces.

Owner & CEO — earlier ventures

2002 – 2008

DVD Universe · start-up in online banking

- › Founder roles across retail and fintech concepts — direct sales, banking relationships, and a regulated online-credit venture taken through business planning and early funding.

Enterprise Technology — early career

1998 – 2002

Orad Hi-Tec Systems (public) · Allot Communications

- › Early-career enterprise technology at Orad (real-time broadcast graphics) and Allot (QoS networking) — network architecture, internal systems, and web engineering.
