KEY METRICS

45 countries served
40+ rail operators integrated
100+ B2B clients
29 team · 15 engineers led
\$1-5M revenue business

LEADERSHIP

Engineering leadership (15+)
Product strategy & roadmap
Technology & cloud strategy
P&L & budget ownership
Board & stakeholder comms

AI & AUTOMATION

LLM orchestration & agents
Multi-agent workflows
Legal-tech & doc intelligence
Financial AI systems
AI cost & token optimization

ENGINEERING

Python · PHP · JavaScript
MySQL · PostgreSQL
AWS · Azure · GCP
REST APIs · iOS/Android
GitHub · Sentry

COMMERCIAL

Enterprise partnerships
Technical / solutions sales
Performance marketing
(Google/Meta/TikTok)
Solution architecture

EXECUTIVE SUMMARY

28 years shipping software. A decade building and running a global travel-tech company end to end — 45 countries, 40+ rail operators, a 15-engineer organization. Today I architect and code AI agent systems that real customers rely on every day: legal, financial, and decision-support platforms live in production. Most technology leaders manage AI. I build it.

PROFESSIONAL EXPERIENCE

CTO & Builder — AI Systems

2024 – Present

Independent — Tel Aviv

- › Architect and developer — hands-on — of AI agent and automation systems in active customer use: LLM orchestration, Python, PostgreSQL, multi-cloud.
- › Legal-AI platform used daily by practicing Israeli lawyers — bilingual (Hebrew/English) document intelligence, court-decision analysis, and filing-workflow synthesis.
- › Autonomous financial AI agents running 24/7 against live markets — multi-model signal integration, risk gates, real-time monitoring and alerting.
- › AI BoardRoom — a working multi-agent product simulating executive perspectives (Munger, Buffett, Dalio among them) for strategic decision-support, on desktop and mobile.
- › Cost-efficient AI engineering as a discipline — cutting token spend through context and schema optimization while delivering the same outcomes, as AI moves from experiment to budget line.
- › Everything designed, coded, deployed, and operated end to end — production infrastructure, monitoring, alerting, and recovery included.

Founder, CEO & Product Leader

2016 – 2026

Save A Train — Global Rail-Distribution Platform

- › Founded and scaled a B2B rail-booking and distribution platform to 100+ business clients across 45 countries — a \$1-5M revenue business.
- › Built and led the full 29-person organization, including a 15-engineer team across web, mobile, API, and data; integrated 40+ international rail operators; shipped iOS and Android apps and a partner-facing API on AWS, Azure, and GCP.
- › Owned the entire product lifecycle — roadmap, architecture, release, commercial alignment — led enterprise partnership negotiations with major travel and technology organizations, and presented strategy and performance to the board.
- › Wound down operations in 2026 as enterprise rail adoption lagged forecasts and travel-tech capital rotated to AI — accelerating a full pivot into building AI systems.

ADVISORY & BOARD ROLES

Strategic Advisor

2021 – Present

EDUCATION

B.A. Business Management & Information Systems

Ono Academic College · 2013–2017

Management Studies

Tel Aviv University · 2008

Executive & Entrepreneurship Programs

Israeli Management Center

BEYOND WORK

Creator & Influencer —

[@thedadlifeway](#)

12,000+ followers · family & lifestyle,
grown organically over 2 years

ALLRAIL — Alliance of Passenger Rail New Entrants (Brussels/Cologne)

- › Advise the European alliance of passenger-rail new entrants on rail standardization and market liberalization.

Investor & Advisor

2017 – Present

Baba Entertainment — Mobile & TV Gaming

- › Advisory role with a mobile and TV gaming studio recognized for best-in-class game economics.
-

EARLIER EXPERIENCE

Co-Founder & CMO

2015 – 2017

3D-Innotech — Venture Builder

- › Co-founded a venture-builder operating 14 startup holdings across multiple industries; led marketing and go-to-market across the portfolio.
- › Ran large-scale performance advertising across Google, Meta (Facebook/Instagram), and TikTok — managing paid-acquisition budgets and scaling campaigns against ROAS and CAC targets.
- › Built custom attribution dashboards and automated campaign-management systems to optimize spend, track funnel performance, and report results across the portfolio.

Founder & Investor — Digital Media & Ventures

2010 – 2016

Robinhood · Accessteam · Angel Investing

- › Built and operated online media and content businesses; angel investor and advisor to early-stage startups (INTKEYS, Clicksi).
- › Deep expertise in web traffic systems, bot/detection dynamics, and large-scale data acquisition developed across high-volume media operations.

Owner, Founder & CTO

2003 – 2007

Kilombo Multimedia Ltd. — Herzliya

- › Built and ran a multimedia import/distribution business (3 stores + online), ~5M NIS annual revenue; led 15 staff and online sales across major marketplaces.

Founder — Early Ventures

2002 – 2008

DVD Universe · Start-Up in Online Banking

- › Founder roles across retail and fintech concepts — direct sales, banking relationships, and a regulated online-credit venture taken through business planning and early funding.

Enterprise Technology — Early Career

1998 – 2002

Orad Hi-Tec Systems (Public) · Allot Communications

- › Early-career enterprise technology at Orad (real-time broadcast graphics) and Allot (QoS networking) — network architecture, internal systems, and web engineering.
